Instructions to Authors

The editorial policy of the journal favors publication of integrative articles containing multiple experiments and extensive theoretical development. However, articles reporting single experiments are also appropriate, so long as they report compelling data with a clear theoretical message. Other appropriate forms of submission include brief comments on articles published in the journal and replies to such comments. In addition, occasional literature reviews advancing our knowledge in the field will also be considered. For further information on content, authors should refer to the editorial in the January 1985 issue of the journal (Vol. 11, No. 1, pp. 1–2). For information on the other three *JEP* journals, authors should refer to editorials in those journals.

Authors should prepare manuscripts according to the *Publication Manual of the American Psychological Association* (3rd ed.). All manuscripts must include an abstract of 100–150 words typed on a separate sheet of paper. Typing instructions (all copy must be double-spaced) and instructions on the preparation of tables, figures, references, metrics, and abstracts appear in the *Manual.* Also, all manuscripts are subject to editing for sexist language.

APA policy prohibits an author from submitting the same manuscript for concurrent consideration by two or more journals. APA policy also prohibits duplicate publication, that is, publication of a manuscript that has already been published in whole or in substantial part in another journal. Prior and duplicate publication constitutes unethical behavior, and authors have an obligation to consult journal editors if there is any chance or question that the paper might not be suitable for publication in an APA journal. Also, authors of manuscripts submitted to APA journals are expected to have available their raw data throughout the editorial review process and for at least 5 years after the date of publication.

Authors will be required to state in writing that they have complied with APA ethical standards in the treatment of their sample, human or animal, or to describe the details of treatment. A copy of the APA Ethical Principles may be obtained from the APA Ethics Office, 1200 17th Street, N.W., Washington, DC 20036.

Anonymous reviews are optional, and authors who wish anonymous reviews must specifically request them when submitting their manuscripts. Each copy of a manuscript to be reviewed anonymously should include a separate title page with authors' names and affiliations, and these should not appear anywhere else on the manuscript. Footnotes that identify the authors should be typed on a separate page. Authors should make every effort to see that the manuscript itself contains no clues to their identities.

Manuscripts should be submitted in quadruplicate. All copies should be clear, readable, and on paper of good quality. Authors should keep a copy of the manuscript to guard against loss.

Mail manuscripts and address all correspondence at all stages of handling to the Editor, Henry L. Roediger III, Department of Psychological Sciences, Purdue University, West Lafayette, Indiana 47907.

For the other *JEP* journals, authors should submit manuscripts (also in quadruplicate) to one of the editors at the following addresses: *Journal of Experimental Psychology: General*, Sam Glucksberg, Department of Psychology, Princeton University, Princeton, New Jersey 08544; *Journal of Experimental Psychology: Human Perception and Performance*, William Epstein, Department of Psychology, University of Wisconsin, W. J. Brogden Psychology Building, 1202 West Johnson Street, Madison, Wisconsin 53706; *Journal of Experimental Psychology: Animal Behavior Processes*, Michael Domjan, Department of Psychology, University of Texas, Austin, Texas 78712. When one of the editors believes a manuscript is clearly more appropriate for an alternative journal of the American Psychological Association, the editor may redirect the manuscript with the approval of the author.
